INTERNAL MEDICINE | INDEPENDENT PHYSICIAN REVIEWER

Physician-led review for health plans, IROs, utilization-management organizations, workers' compensation programs, and healthcare technology teams. Clear, evidence-based determinations aligned with the medical record, applicable policy, and recognized clinical criteria.

CORE CAPABILITIES

Medical necessity & level of care	Prospective, concurrent, and retrospective review; inpatient versus observation; continued stay; procedures and requested services.
Prior authorization & medication coverage	Eligibility, policy alignment, step therapy, exceptions, FDA labeling, guidelines, and targeted literature review.
Peer review, P2P & appeals	Independent peer review, timely peer-to-peer consultations, reconsiderations, first- and second-level appeals, and audit-ready rationale.
Workers' compensation	Treatment appropriateness, causation, guideline application, and evidence review.
Clinical AI validation	Accuracy, criteria alignment, evidence traceability, unsupported-claim review, bias and hallucination review, edge-case testing, and escalation logic.

CRITERIA & EVIDENCE

MCG | InterQual | CMS and Medicare guidance | NCDs and LCDs | California MTUS | MTG | ODG | commercial-payer policy | FDA-approved labeling | current peer-reviewed literature

QUALIFICATIONS

Board certification American Board of Internal Medicine	Active licenses California, Texas, Ohio, Michigan, Indiana; IMLCC qualified
Clinical perspective Active hospital medicine practice and academic teaching	Review experience 6,500+ physician reviews completed since 2022
Systems Epic, Cerner, MEDITECH, Soarian, Allscripts, SPSS	Languages English and Arabic

Engagements: Panel credentialing, individual assignments, surge capacity, remote physician-review work, timely peer-to-peer coverage, and focused clinical-validation projects.

Professional services are provided through Hanna Medical Consulting MD LLC. Business-to-business services only. No direct patient care or personal medical advice. Do not send patient records or protected health information by public email; clinical materials should be shared only through a client-approved secure system.
